Faculty of Computers and Informatics
General Program
Computer Networks (IT202)
Number of Questions: 30

Year: 2nd Year Midterm
Time: 1 hour
Date: April 2023
Total: 15 Marks **(Model 1A)**

**Student name:**..... **Level:**..... **Section no.**.....

- **Please, focus while reading the questions, I trust your skills**

Q1. (10 Marks) **Choose the suitable answer**

| | |
|---|---|
| 1. | Which of this is not a network edge device?<br>(a) PC (b) Smartphones (c) Servers (d) Switch |
| 2. | A _____ set of rules that governs data communication.<br>(a) Protocols (b) Standards (c) RFCs (d) Servers |
| 3. | Which of the following are network services?<br>(a) File service (b) Print service (c) Database service (d) All of the above |
| 4. | Two devices are in a network if _____<br>(a) a process in one device is able to exchange information with a process in another device<br>(b) a process is running on both devices<br>(c) PIDs of the processes running on different devices are the same<br>(d) One process is active and another is inactive |
| 5. | If all devices are connected to a central hub, then topology is called<br>(a) Bus Topology (b) Ring Topology (c) Star Topology (d) Tree Topology |
| 6. | The performance of the data communications network depends on _____<br>(a) Number of users (b) The hardware and software (c) The transmission (d) All of the above |
| 7. | What is the name of the network topology in which there are bi-directional links between each possible node?<br>(a) Ring (b) Mesh (c) Tree (d) Star |
| 8. | Which of the following TCP/IP protocols is used for transferring files form one machine to another.<br>(a) FTP (b) SNMP (c) SMTP (d) RPC |
| 9. | DNS can obtain the _____ of host if its domain name is known and vice versa.<br>(a) Station address (b) IP address (c) Port address (d) Checksum |
| 10. | Which of the transport layer protocols is connectionless?<br>(a) UDP (b) TCP (c) FTP (d) SNMP |
| 11. | The packet of information at the application layer is called _____<br>(a) Packet (b) Message (c) Segment (d) Frame |
| 12. | To deliver a message to the correct application program running on a host, the _____ address must be consulted.<br>(a) IP (b) MAC (c) Port (d) None of the mentioned |
| 13. | Application layer protocol defines _____<br>(a) types of messages exchanged (b) message format, syntax and semantics<br>(c) rules for when and how processes send and respond to messages (d) all of the mentioned |
| 14. | Which of the following usually observes each activity on the internet of the victim, gathers all information in the background, and sends it to someone else?<br>(a) Malware (b) Spyware (c) Adware (d) All of the above<br>(b) |
| 15. | Electronic mail uses which Application layer protocol?<br>(a) SMTP (b) HTTP (c) FTP (d) SIP |
| 16. | Which device performs the function of determining the path that messages should take through internetworks?<br>(a) a DSL modem (b) a firewall (c) a web server (d) a router |
| 17. | What benefits of using a layered network model?<br>(a) It speeds up packet delivery.<br>(b) It prevents designers from creating their own model.<br>(c) It prevents technology in one layer from affecting other layers.<br>(d) It ensures a device at one layer can function at the next higher layer. |

| | |
|---|---|
| 18. | What is an ISP?<br>(a) It is a standards body that develops cabling and wiring standards for networking.<br>(b) It is a protocol that establishes how computers within a local network communicate.<br>(c) It is an organization that enables individuals and businesses to connect to the Internet.<br>(d) It is a networking device that combines the functionality of several different networking devices in one. |
| 19. | What does HTTPS stands for?<br>(a) Hyper Text Transmission Protocols (b) Hyper Text Transfer Protocol Secure<br>(c) Hyper Text Tile Protocols (d) None |
| 20. | Which of the following protocol is used to retrieve emails?<br>(a) SMTP (b) POP3 (c) FTP (d) SNMP |
| 21. | In a peer to peer computer networking architecture, each computer acts as a ___.<br>(a) Server (b) Client (c) Both server and client depending the need (d) All |
| 22. | Identify the correct order in which the following actions take place in an interaction between a web browser and a web server.<br>1. The web browser requests a webpage using HTTP.<br>2. The web browser establishes a TCP connection with the web server.<br>3. The web server sends the requested webpage using HTTP.<br>4. The web browser resolves the domain name using DNS.<br>(a) 4,2,1,3 (b) 1,2,3,4 (c) 4,1,2,3 (d) 2,4,1,3 |
| 23. | Central Computer which is powerful than other computers in the network is called as _____.<br>(a) Client (b) Server (c) Hub (d) Switch |
| 24. | In a Peer to Peer network architecture, all computers have equal priority. State TRUE/FALSE.<br>(a) TRUE (c) FALSE |
| 25. | The time taken by a packet to travel from client to server and then back to the client is called _____<br>(a) STT (b) RTT (c) PTT (d) Total time |
| 26. | HTTP messages are sent on port number _____<br>(a) 20 (b) 40 (c) 60 (d) 80 |
| 27. | The number of objects in a Web page which consists of 4 jpeg images and HTML text is _____<br>(a) 4 (b) 1 (c) 5 (d) 7 |
| 28. | Which of the following protocol is used to send email?<br>(a) SMTP (b) POP3 (c) POP (d) SNMP |
| 29. | Application layer is implemented in _____<br>(a) End system (b) NIC (c) Ethernet (d) Packet transport |
| 30. | The applications of the Client and Server Model are<br>(a) World Wide Web (b) Network Printing (c) Email (d) All of the above |

**Best Wishes,**

**(Model 1A)**
